VIBRATION TESTING SHAKER SYSTEM SOLUTIONS

The Modal Shop's electrodynamic exciter family includes small permanent magnet shakers rated from 500 lbf (2.2 kN) down to 2 lbf (9 N). Available designs include the revolutionary SmartShaker™ with integrated power amplifier, a variety of mini, through-hole modal, dual purpose platform and accelerometer calibration shakers, along with power amplifiers, and test accessories. These transducers are ideal for applications ranging from experimental modal analysis and general vibration testing of small components and sub-assemblies to vibration sensor testing and calibration.

The following selection guide on the reverse provides an overview of the basic shaker specifications. A simple graphical representation of shaker systems paired with appropriate power amplifiers indicates the corresponding system force ratings. Kit model numbers simplify the selection and ordering process, insuring that all the necessary shaker, amplifier, stingers, cooling blowers (if needed), and accessories are included. Visit our website for more information about each shaker.
